

EMT Slip Coupling Set Screw Type

Steel - Zinc plated

ELECMAN® Steel set-screw EMT slip couplings join the ends of two EMT conduits. Equipped with exclusive central set screws, the fitting slides smoothly onto conduits for precise alignment and snug installation. This design removes the need for flexible conduits between prefabricated conduit racks. It cuts workshop prefabrication time, boosts on-site construction efficiency, and raises overall job productivity. Durable steel construction offers reliable mechanical strength and secure interconnection between conduit sections.

Material:

Steel

Type:

Set screw type

Surface Finish:

Zinc plated

Certification & Standard

Certification:

Manufactured to Underwriters Laboratory

Safety Standards UL 514B

UL File No.: E513114

Packing information:

The packing information of steel EMT slip couplings set screw type are as indicated in Table 1.
